TAMID QUANT

NEW YORK UNIVERSITY // QUANT FINANCE DIV

The model is the message.

TAMID Quant is NYU's quantitative research and investment division. We build models, run capital, and produce research-grade output.

WHO WE ARE

TAMID Quant is the quantitative research and investment division of TAMID Group at NYU. We are not a finance club. We are not a case competition team. We are a research operation that builds real models, manages a real paper portfolio, and produces work that resembles what analysts at quantitative funds do on day one.

RESEARCH

BUILD

We construct quantitative models — factor models, cointegration strategies, signal research — from scratch, with real data.

CAPITAL

MANAGE

Members run an actively managed paper portfolio using Alpaca. Every decision is model-driven and documented.

TALENT

DEVELOP

Alumni place at hedge funds, quant desks, and trading firms. The work speaks louder than the resume line.

// POSITIONING

WE ARE

- A quantitative research division
- Model-driven investors
- Research-grade output producers
- A meritocracy — work quality decides
- Connected to Israeli tech via TAMID

WE ARE NOT

- A finance club
- A networking group
- A case competition team
- A credential on a resume
- Political or religious in any capacity

// TRACKS

01

FUND

Equity research, factor models, long/short strategies. Weekly pitch format. Alpaca paper execution.

02

QUANT RESEARCH

Signal research, backtesting, statistical arbitrage. Python-first. Produces publishable memos.

03

EDUCATION

Onboarding curriculum. Covers stochastic calculus, ML in finance, market microstructure.

LOGO SYSTEM

The TAMID Quant mark is a hollow chamfered reconstruction of the TAMID Group logo. Geometry is preserved exactly — proportions traced from the original — but rendered as outline-only with chamfered corners for a precision-engineered feel.

// PRIMARY LOCKUPS

TAMID
QUANT

HORIZONTAL — DARK

TAMID
QUANT

STACKED — DARK

MARK ONLY

// BACKGROUND VARIANTS

VOID BLACK
Primary digital context.

SURFACE DARK
Cards, panels, surfaces.

WHITE (PRINT)
Print only. Never digital.

// FORBIDDEN USAGES

RECOLORED
Never change the stroke color outside the palette.

FILLED
The mark is hollow only. Never fill the interior.

STRETCHED
Never alter proportions or aspect ratio.

WITH EFFECTS
No shadows, glows, gradients, or textures.

// CLEAR SPACE & MINIMUM SIZE

COLOR SYSTEM

Color carries meaning here the same way it does on a trading terminal. Blue is signal. Green is positive return. Red is drawdown. White is critical data. Everything else is noise.

TAMID BLUE	VOID	WHITE	INDUSTRIAL	ALPHA GREEN	DRAWDOWN RED
SIGNAL / ACCENT	BACKGROUND	PRIMARY DATA	SECONDARY BRAND	POSITIVE / GAIN	NEGATIVE / LOSS
#42B5E8	#1E1E1E	#FFFFFF	#58595B	#2ECC71	#E74C3C

// SEMANTIC COLOR RULES

TAMID BLUE	Section tags, borders, active states, hyperlinks, data labels. Never as background fill. Max 15% of any composition.
ALPHA GREEN	Positive returns, outperformance, gains, buy signals. Use sparingly — every green element must mean something.
DRAWDOWN RED	Negative returns, losses, warnings, errors, sell signals. Same discipline as green. Never decorative.
SIGNAL AMBER	Alerts, in-progress status, annotations requiring attention. Not for positive or negative conclusions.
WHITE	Primary headlines, key metrics, ticker symbols. If it's white, it's load-bearing.
GRAY LT	Body copy, descriptions, secondary information. The default text color.

// COLOR DO / DON'T

DO

+ Blue as 1px border on data cards
+ Green only when return > 0
+ White for primary metric values
+ Black backgrounds, always

DON'T

- Blue as background fill color
- Red for decorative elements
- Purple or teal (off-brand)
- Gradients of any kind

TYPE SYSTEM

IBM Plex Mono is the entire type system. Five weights — Light, Regular, Medium, SemiBold, Bold — handle everything from data labels to division headers. One family. No exceptions.

DISPLAY / HEADERS — IBM PLEX MONO BOLD

ALPHA.

Division name, page titles, section openers, hero statements

BODY / PROSE — IBM PLEX MONO REGULAR

Signal research. Factor models. Live capital.

Body copy, research memos, event descriptions, email

METRICS / TAGS — IBM PLEX MONO SEMIBOLD

// SHARPE 1.84 BETA 0.23 VOL 12.4%

Performance metrics, system labels, ticker callouts, section tags

METADATA / SPECS — IBM PLEX MONO LIGHT

HEX #42B5E8 // TRACK: FUND // VER 1.0 // ACTIVE

Hex codes, version tags, metadata, footnotes, document IDs

// TYPE SCALE

STYLE	SIZE	FONT	USAGE
DISPLAY	44px	Plex Mono Bold	Division hero, cover page only
H1	28px	Plex Mono Bold	Section openers
H2	14px	Plex Mono SemiBold	Sub-sections, card headers
BODY	9px	Plex Mono Regular	Research copy, descriptions
METRIC	10px	Plex Mono SemiBold	KPIs, tickers, stat callouts
LABEL	7px	Plex Mono SemiBold	Tags, system identifiers
CAPTION	6.5px	Plex Mono Light	Footnotes, metadata, version strings

WHY IBM PLEX MONO?

Monospace as the primary face commits to the operator aesthetic — every character occupies the same width, the same rhythm. Plex Mono is sharp without being aggressive, engineered by IBM for code and documentation. One family handles every role from hero to footnote.

VOICE & COPY

TAMID Quant writes like a quant fund, not a student org. Every sentence should pass this test: would a quant analyst at a hedge fund be embarrassed to have written this? If yes, rewrite it.

// WRITING PRINCIPLES

01 PRECISION OVER WARMTH
State the thing. 'We run equity research on Israeli tech companies.' Not 'We're passionate about exploring the vibrant Israeli startup ecosystem.'

02 NUMBERS ANCHOR CLAIMS
Any claim about performance, scale, or impact needs a number. 'Seven models deployed.' Not 'a variety of quantitative strategies.'

03 SHORT SENTENCES WIN
Under 20 words per sentence in public-facing copy. Longer in research memos where precision requires it. Never pad.

04 ACTIVE VOICE ONLY
'We run the model.' Not 'The model is run by the team.' Passive voice reads as uncertain. Own the verb.

// BANNED WORDS & PHRASES

- passionate
- excited
- thrilled
- community
- journey
- synergy
- leverage (verb)
- innovative
- unique
- diverse programming
- amazing opportunity
- networking
- hands-on learning
- holistic

// COPY EXAMPLES

RECRUITMENT EMAIL

DONT
Hey! We're so excited to invite passionate students to join our amazing quant family. Come learn about finance in a fun, hands-on environment!

DO
TAMID Quant is open for applications. We run equity research, factor models, and a paper portfolio on Alpaca. Info session Thursday, 7PM, Stern 220.

LINKEDIN BIO

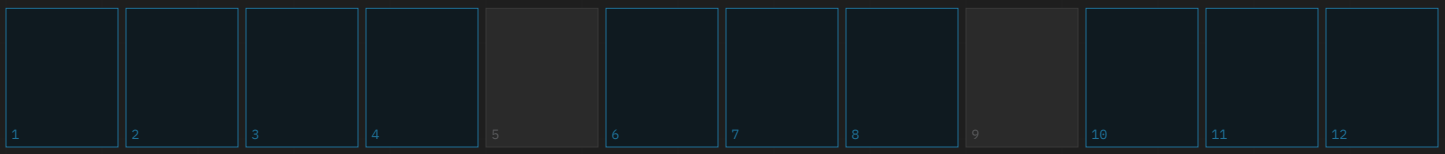
DONT
TAMID Quant at NYU is an innovative student organization passionate about quantitative finance and the dynamic Israeli tech ecosystem!

DO
TAMID Quant is NYU's quantitative research division. We build models. We manage capital. We advise Israeli companies.

LAYOUT & GRID

Layouts follow a 12-column grid, 36pt margins. Information density is high by design. Every element justifies its presence.

// 12-COLUMN GRID



// NAMED LAYOUT PATTERNS

01 RESEARCH MEMO

Left margin tags in Plex SemiBold. Full-width headline. Two-column body: analysis left (8 col), sidebar metrics right (4 col).

02 PITCH DECK SLIDE

Black fill. Ticker + section tag top-left in Plex SemiBold. Large metric centered. Source bar at bottom. No decoration.

03 STAT CALLOUT

3-4 columns. Large Plex Bold number. Plex Light label beneath. 1px blue left border per column. Blue accent only.

04 SECTION BREAK

Full-width 1px TAMID Blue rule. Section number Plex SemiBold left. Section title Plex Bold right.

05 DATA TABLE

Plex Bold column headers. Plex Regular body, numbers right-aligned. Alternating BG1/BG2 rows. Green/red for performance only.

06 EVENT FLYER

Black background. Plex Bold headline. Plex SemiBold date/time/location. B&W candid photo only. Wordmark top-left.

// FORBIDDEN PATTERNS

- X Centered body text or headlines
- X Rounded corners on any container
- X Purple, teal, or any off-palette color
- X Posed or stock photography
- X Decorative dividers or flourishes
- X Light or white backgrounds (digital)
- X Drop shadows or glow effects
- X Gradients of any kind
- X Emoji in any division material
- X Clipart or illustration

// SPACING TOKENS

XS **4px**	SM **8px**	MD **16px**	LG **24px**	XL **36px**	XXL **72px**

DIGITAL & SOCIAL

TAMID Quant's digital presence should feel like a quant fund's investor relations page, not a student organization's Instagram. Every post, email, and slide is a recruiting document.

LINKEDIN
PROFESSIONAL

@tamidquantnyu

Lead with deliverables. Post model write-ups, factor research, alumni placements. No motivational content. Quantify everything.

INSTAGRAM
VISUAL

@tamidquant.nyu

High-contrast B&W photography. Members at whiteboards, terminals, in meetings. Monospaced captions with key metrics. No filters.

WEBSITE
PRIMARY HUB

taquant.nyu.edu

Dark background mandatory. Sections: About, Research, Fund, Team, Apply. Research memos publicly accessible where possible.

EMAIL
DIRECT

taquant@nyu.edu

Plain, direct subject lines. No HTML decorations. SG body. JBM for any numbers or codes. Sign off with name + track.

// CONTENT CADENCE

WEEKLY	LinkedIn: 1 research insight or market observation. Instagram: 1 B&W photo with metric caption.
BIWEEKLY	Model update or factor research summary. Internal newsletter (Substack or email).
MONTHLY	Performance report. Member spotlight (framed around work, not biography). Event recap.
SEMESTER	Full portfolio review deck. Recruitment campaign. Research memo publication.

// PHOTOGRAPHY STANDARDS

● **PREFERRED**	Black and white, high contrast. Members working: coding, at whiteboards, presenting models. Candid only.
● **ACCEPTABLE**	Color with desaturation. Environmental context: trading lab, classroom, Stern building. No filters.
● **FORBIDDEN**	Posed group photos. Stock imagery. Social settings. Low resolution. Anything that reads 'college club.'

// HASHTAGS

#tamidquant #tamidgroup #tamidnyu #quantfinance #alpharesearch #startupnation

RESEARCH STANDARDS

Every piece of written output from TAMID Quant — pitch, memo, model write-up, email — is a reflection of the division. These standards apply to all materials regardless of audience.

// RESEARCH MEMO FORMAT

DATE	2024-11-08
TICKER	NVDA US EQUITY
ANALYST	A. BLATNOY // FUND TRACK
SUBJECT	**FACTOR EXPOSURE ANALYSIS — Q3 EARNINGS REVISION**
CONFIDENCE	**HIGH // BASED ON 3Y BACKTEST**

All memos open with: DATE / TICKER / ANALYST / SUBJECT / CONFIDENCE. Body: Thesis, Data, Model, Risk, Recommendation. No narrative fluff.

// PRESENTATION STANDARDS

01 SLIDE DENSITY
One idea per slide. Key metric large and centered. Supporting data below. No bullets beyond 3 items.

02 DATA LABELING
Every chart axis labeled. Units explicit. Source cited. Date of data stated. No unlabeled lines.

03 COLOR IN CHARTS
Blue for primary series. Green for positive performance. Red for underperformance. Gray for reference lines.

04 NO ANIMATION
Static slides only. No builds, transitions, or fly-ins. The work should not rely on presentation theater.

05 FONT IN DECKS
Plex Mono Bold for slide title. Plex Regular for body. Plex SemiBold for metrics and tickers. No exceptions.

// MODEL DOCUMENTATION REQUIREMENTS

ASSUMPTION LOG
Every model assumption documented. If the model fails without an assumption, it must be stated.

BACKTEST PERIOD
Minimum 3 years in-sample. Out-of-sample validation required. Performance reported on both.

DRAWDOWN REPORT
Maximum drawdown, Sharpe ratio, and Calmar ratio reported for every live-traded strategy.

VERSION CONTROL
Models versioned (v1.0, v1.1, etc.). Changes logged with date and analyst name. Stored in shared repo.

// NATIONAL COMPLIANCE
Compliant with TAMID Group national guidelines (2022-23). Questions: melissa@tamidgroup.org
